L1 Award in Electric/Hybrid Awareness MTI

Level

1

Location

Mira Technology Institute

Introduction

The automotive sector is an exciting, ever-evolving industry that opens up a huge range of career options for employees and diversifies opportunities for additional income routes for employers. Here at the MTI, NWSLC we have a number of short courses available to up skill current employees or equip individuals with new knowledge. Our courses are designed to meet the needs of industry and to stay aligned as much as possible with changes in the sector. This short course is planned over a day. It is designed for those people who may encounter electric/hybrid vehicles and require safety awareness. It is suitable for non-technical people such as managers, valeters, parts, sales staff and electric vehicle drivers. It contains the knowledge of the dangers surrounding electric/hybrid vehicles and the precautions to avoid potential injury.

Please Note: This is a knowledge unit only and does not deem someone competent to work on the high energy electrical system of an electric/hybrid vehicle.

Study Outline

During this short course you will learn about the types of electric /Hybrid vehicles available, understand the hazards around high energy electrical systems and know how to work safely around electric/hybrid vehicles.

Entry Requirements

There are no entry requirements for the course, other than having an interest in changes in technology or working in an environment where electric vehicles operate. It is recommended that you will hold 3 GCSEs in English, Maths and a Science based unit.

Equipment

Items for this course will be supplied.

Attendance

You will need to attend for the full day.

Assessment

Assessment of this qualification is via an online test.

COURSE INFO

L2 Award Electric/Hybrid Hazard Management MTI

Level

2

Location

Mira Technology Institute

Introduction

The automotive sector is an exciting, ever-evolving industry that opens up a huge range of career options for employees and diversifies opportunities for additional income routes for employers. Here at the MTI, NWSLC we have a number of short courses available to up skill current employees or equip individuals with new knowledge and new practical skills. Our courses are designed to meet the needs of industry and to stay aligned as much as possible with changes in the sector

This accredited qualification is designed for those people who may encounter accident damaged or broken down electric/hybrid (all variations) vehicles, e.g. emergency services and roadside recovery operators. It contains the knowledge required to work safely around a vehicle that may have or had damage to its high energy/electrical system.

Please Note: This is a knowledge unit only and does not deem someone competent to work on the high energy electrical systems of an electric/hybrid vehicle.

Study Outline

During this short course you will know about the types of electric/hybrid vehicles available, understand the hazards around motor vehicle high energy electrical systems, know how to work safely around electric/hybrid vehicles and know how to reduce the risk of injury when encountering electric/hybrid vehicles.

Entry Requirements

There are no entry requirements for the course, other than having an interest in changes in technology or working in an environment where electric vehicles operate. Progression from our level 1 or 2 course would be ideal. It is recommended that you will hold 3 GCSEs in English, Maths and a Science based unit.

Equipment

Items for this course will be supplied.

Attendance

You will need to attend for the full 2 day.

Assessment

Assessment of this qualification is via an online test and oral assessment.

Introduction

The automotive sector is an exciting, ever-evolving industry that opens up a range of career options for employees and diversifies opportunities for additional income routes for employers. Here at the MTI, NWSLC have a number of short courses available to up skill current employees with new knowledge and new practical skills. Our courses are designed to meet the needs of industry and to stay aligned with changes in the sector. This qualification introduces learners to electric and hybrid vehicle technology including, and in particular, the safety requirements of working on these types of vehicles, e.g. whilst carrying out servicing, or general repairs that are not related to the high energy electrical system. Note: This qualification does not prove that someone is competent to work on the high energy electrical system, and assumes a good level of electrical understanding. This unit does not cover commercial or domestic electrical installations including charging equipment and cables.

Study Outline

During this short course you will know about electrically propelled vehicle system components and operation, understand the hazards surrounding electrically propelled vehicles, know how to reduce the risks to yourself and others when working on electrically propelled vehicles, know how to safely prepare the vehicle when carrying out maintenance and routine repair activities on electrically propelled vehicles and be able to work safely on an electrically propelled vehicle.

Entry Requirements

There are no entry requirements for the course, other than having an interest in changes in technology or working in an environment where electric vehicles operate. Progression from our level 1 or 2 course would be ideal. It is recommended that you will hold 3 GCSEs in English, Maths and a Science based unit.

Equipment

Safety boots and overalls/smock are required.

Attendance

You will need to attend for the full 3 day.

Entry Requirements

Successful completion of a level 2 refinishing course, GCSE Grades A - C, initial assessment levels level 2 - level 3 in English and Maths, good attendance and attitude to match.

Equipment

You will require steel toe cap boots, overalls, pen/pencil, notepad/folder and a memory stick. In addition for body and paint students you will require an industry standard face mask for when painting in the booth (this is a personal piece of equipment - not to be shared).

Attendance

You will be required to attend 3 days per week as this is a full-time course, 95% attendance is essential. It is compulsory for you to attend all sessions including English and Maths Functional Skills and work experience. If you are in a position where you have GCSE grades A-C in English and Maths or equivalent functional skill qualifications at level 2, you will have the opportunity to increase your skills further by discussing and agreeing a suitable advanced qualification.

Assessment

You will be assessed carrying out a number of practical tasks in the workshop, there will also be in-class verbal

Important details

North Warwickshire & Hinckley College has taken care to ensure the information on the website is as accurate as possible at the time of publication. It is advisable to check your chosen course information prior to enrolment.

and written assessments and a number of on-line assessments for all of your study programme elements (including English and Maths).

Progression

On successful completion of your study programme including English and Maths your next step will be to progress in to employment or a suitable apprenticeship where the work based elements would need to be achieved. You will have to have employment in the trade to access this opportunity.

Currently in the planning stages is a level 4 advanced vehicle diagnostics and Management Competence qualification which could be your next step, again you would need to ensure you are employed in a company.
