

# A global skills centre, training the workforce of the future.

# Training the workforce of the future

The MIRA Technology Institute (MTI) will be a **state-of-the-art, purpose-built centre for automotive training excellence**, situated on the **world-class** MIRA Technology Park in Hinckley.

North Warwickshire and South Leicestershire College is the lead partner in the MTI, a unique collaboration between the College, HORIBA MIRA, the University of Leicester, Loughborough University and Coventry University, working with leading organisations in the automotive industry. Built with £9.5m investment from the UK Government's Local Growth Fund (awarded to the College by the LLEP and the Department for BEIS), the MTI is a 24,500 sq ft specialist facility to train the next generation of engineers **in the latest automotive technology**.

The MTI offers a seamless skills escalator of accredited programmes from Level two to Level seven, complemented by bespoke and non-accredited courses and sessions.

## Why use the MIRA Technology Institute...?

- Employers can **upskill their current workforce** in the latest in automotive technology or access **a new generation of automotive engineering apprentices**, trained in a cutting-edge environment
- The **MTI Skills Escalator** progresses from Level 2 **apprenticeships** up to higher and degree level apprenticeships, running alongside **academic programmes** up to doctorate level
- **State of the art workshop facilities** incorporating the latest in automotive engineering technology
- Training co-located with other like-minded, forward-thinking companies
- Employers can maximise the use of their apprenticeship levy and/or access other government training funding
- Access to Rapid Prototype, 3D Printing, Robotics, Fluid Power, Mechatronics, Electronic Circuit Design and other areas of new, **disruptive technology**
- MTI training is **employer led**. We are working closely with the automotive industry and its supply chain to ensure relevance to the needs of the future
- Securing 'strategic partner status' with MTI will allow automotive companies to stay at the forefront of developments in the automotive sector.

"Our vision is to be a global centre of excellence where industry leaders, engineers, technicians and business professionals come to develop industry essential skills, key to fuelling their career ambitions and their employer's business success.

The MIRA Technology Institute will produce specialist skills and qualifications that students and employers will aspire to achieve. We will constantly seek to create learning opportunities in the cutting-edge technologies required to develop innovative, inspiring products which create wealth and improve transport in all of its forms for future generations."

## Apprenticeships for the next generation of Automotive Engineers

North Warwickshire and South Leicestershire College has a long history of training in the automotive sector, encouraging innovation in skills development.

Through our leading role in the MIRA Technology Institute, we are continuing to develop our outstanding automotive engineering apprenticeships to focus on the future of the transport sector. Our BTEC and EAL accredited qualifications provide a robust skills base for students entering the sector, and in the environment of the MTI, apprentices will be learning where the vanguard of the industry come to train.

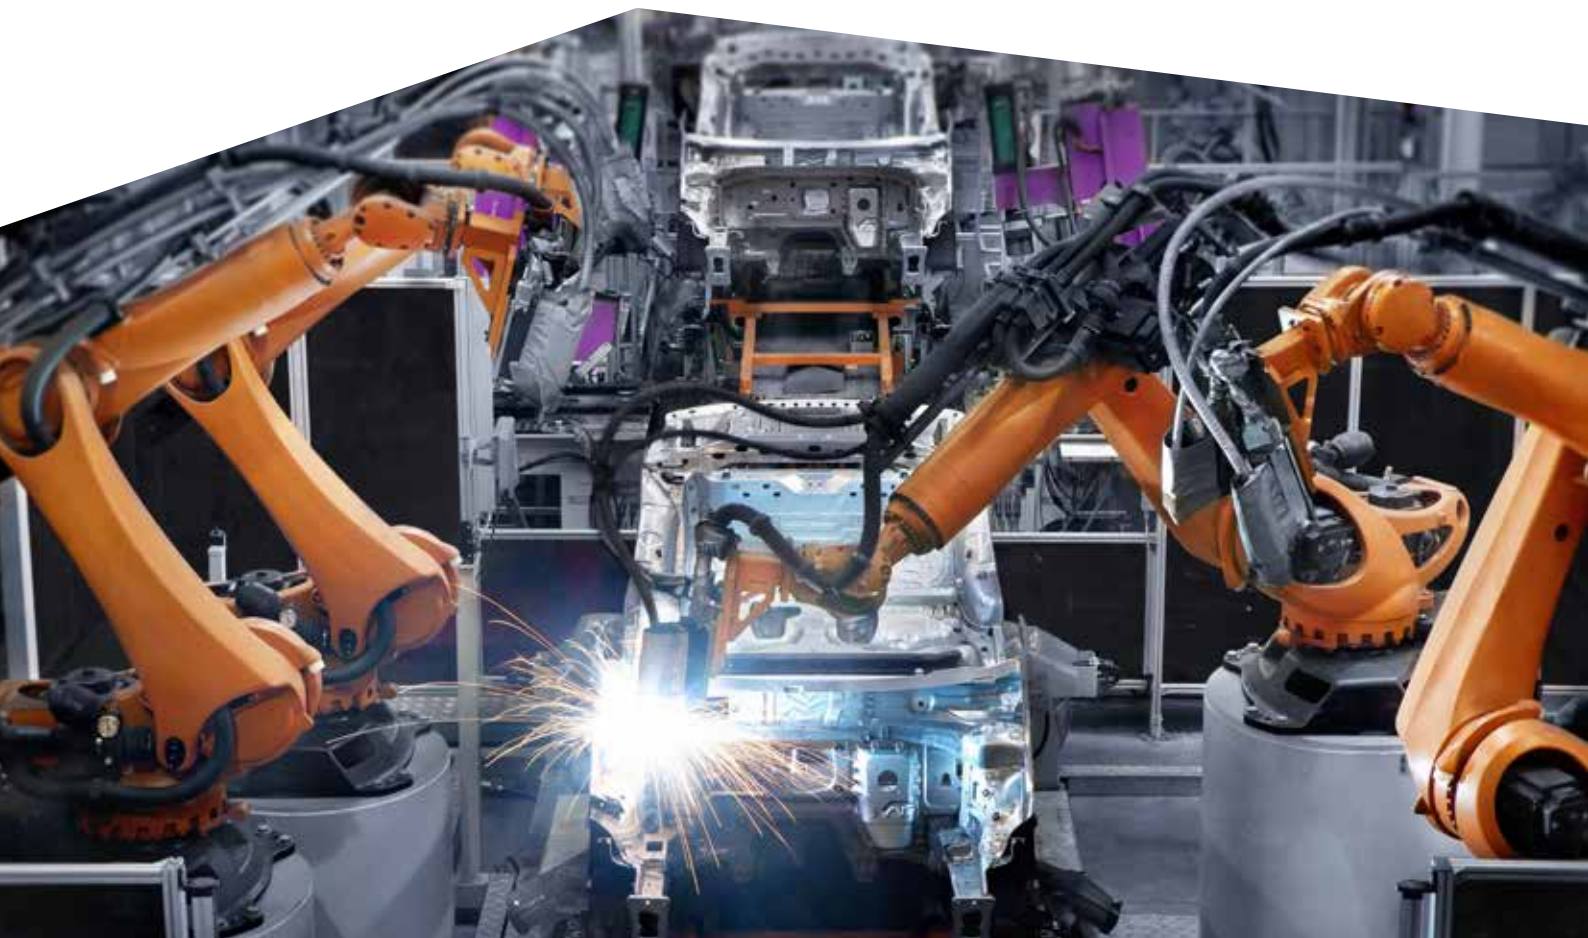

### What's Available?

Level 2	Level 3	Level 4	Level 5
Intermediate Apprenticeship in Automotive Engineering	Advanced Apprenticeship in Automotive Engineering  Practitioner Certificate in Quality Management	Higher Apprenticeship in Advanced Engineering: Automotive  Higher Apprenticeship in Business and Management: Associate Project Manager  HNC BTEC in Automotive Engineering	Professional Certificate in Quality Management

The key word is 'flexibility'; the team at North Warwickshire and South Leicestershire College can deliver apprenticeships around your business and training needs, producing employees who are equipped to progress and to make a positive impact to a business.
